DETAILED ACTION

General status

1. This is a First Action on the Merits. Claims 1 - 20 are pending in the case and are being examined.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Eldon B. Haft [US 3,621,169].

Eldon B. Haft discloses a switching gas damper comprising:

- a cuboid enclosure [40, column 4, lines 55 +] with a front wall, a rear wall and a cover [Figures 1-7];
- a bottom including separate inlet openings [Figure 1], wherein each inlet opening includes an associated outlet channel, formed by at least one of channel walls and deflection elements [51-54].

Allowable Subject Matter

3. Claims 2 – 20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Kurzmann [US 6,670,872], Turkmen [US 6,222,146], Bartlett [US 2,310,728], Strobel [US 3,582,966] all disclose venting means for circuit breakers.

Applicant also should consider these references in response to this office action.

Should issue arise concerning the rejection presented above, these references may be relied upon in a subsequent action to support the lack of novelty or obviousness of claimed subject matter to one of ordinary skill in the art.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Marina Fishman whose telephone number is 571-272-1991. The examiner can normally be reached on 7-5 M-T.

6. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.
